Conexion ODBC

## Class ConexionODBC

Conexion ODBC

Inheritance

System.Object

ConexionODBC

Namespace: Conexion

Assembly: Polideportivo.dll

Syntax

public class ConexionODBC

#### Methods

## abrirConexion()

Inicia la conexión hacia ODBC con el DSN especificado.

Declaration

public OdbcConnection abrirConexion()

#### Returns

| ТҮРЕ                            | DESCRIPTION |
|---------------------------------|-------------|
| System.Data.Odbc.OdbcConnection |             |

#### cerrarConexion(OdbcConnection)

Cierra la conexión hacia ODBC con el DSN especificado.

Declaration

public void cerrarConexion(OdbcConnection conexion)

#### Parameters

| ТҮРЕ                            | NAME     | DESCRIPTION |
|---------------------------------|----------|-------------|
| System.Data.Odbc.OdbcConnection | conexion |             |

# Namespace Controlador

## Classes

controladorDeporte

Namespace: Controlador

Assembly: Polideportivo.dll

Syntax

public class controladorDeporte

#### Constructors

## controladorDeporte()

Declaration

public controladorDeporte()

## controladorDeporte(formDeporte)

Declaration

public controladorDeporte(formDeporte Vista)

#### Parameters

| ТҮРЕ        | NAME  | DESCRIPTION |
|-------------|-------|-------------|
| formDeporte | Vista |             |

#### Methods

actualizarTablaDeporte()

Declaration

public void actualizarTablaDeporte()

## Class controlador Equipo

Clase que gestiona la tabla de equipos de la base de datos

Inheritance

System.Object

controladorEquipo

 $Namespace \colon \textbf{Controlador}$ 

Assembly: Polideportivo.dll

Syntax

public class controladorEquipo

#### Constructors

## controladorEquipo()

Declaration

public controladorEquipo()

#### controladorEquipo(formEquipo)

Declaration

public controladorEquipo(formEquipo Vista)

#### Parameters

| ТҮРЕ       | NAME  | DESCRIPTION |
|------------|-------|-------------|
| formEquipo | Vista |             |

#### Fields

#### modeloFila

Declaration

public dtoEquipo modeloFila

#### Field Value

| ТУРЕ      | DESCRIPTION |
|-----------|-------------|
| dtoEquipo |             |

#### Methods

## actualizarTablaJugadores()

Declaration

public void actualizarTablaJugadores()

#### IlenarModeloConFilaSeleccionada()

Llena la tabla de equipo con lo que se tiene ingresado en el dtoEquipo

Declaration

## Class controlador Jugador

Clase que gestiona la tabla de jugadores de la base de datos

Inheritance

System.Object

controladorJugador

Namespace: Controlador

Assembly: Polideportivo.dll

Syntax

public class controladorJugador

#### Constructors

## controladorJugador()

Declaration

public controladorJugador()

## controladorJugador(formJugador)

Declaration

public controladorJugador(formJugador Vista)

#### Parameters

| ТҮРЕ        | NAME  | DESCRIPTION |
|-------------|-------|-------------|
| formJugador | Vista |             |

#### Methods

#### actualizarTablaJugadores()

Declaration

public void actualizarTablaJugadores()

## IlenarModeloConFilaSeleccionada()

Metodo que sirve para llenar la tablaJugadores con los datos que tenemos dentro del dtoJugadores

Declaration

# Class controlador Participante

Inheritance

System.Object

controladorParticipante

Namespace: Controlador
Assembly: Polideportivo.dll

Syntax

public class controladorParticipante

#### Constructors

## controladorParticipante()

Declaration

public controladorParticipante()

## controladorParticipante(formParticipante)

Declaration

public controladorParticipante(formParticipante Vista)

#### Parameters

| ТУРЕ             | NAME  | DESCRIPTION |
|------------------|-------|-------------|
| formParticipante | Vista |             |

#### Methods

## actualizarTablaParticipante()

Declaration

public void actualizarTablaParticipante()

#### IlenarModeloConFilaSeleccionada()

Declaration

## Class controladorPartido

Inheritance

Namespace: Controlador
Assembly: Polideportivo.dll

Syntax

public class controladorPartido

#### Constructors

#### controladorPartido()

Declaration

public controladorPartido()

## controladorPartido(formPartido)

Declaration

public controladorPartido(formPartido Vista)

#### Parameters

| ТҮРЕ        | NAME  | DESCRIPTION |
|-------------|-------|-------------|
| formPartido | Vista |             |

#### Methods

## actualizarTablaPartido()

Declaration

public void actualizarTablaPartido()

#### IlenarModeloConFilaSeleccionada()

Declaration

# Class controlador Usuario Registrar

Inheritance

System.Object

control ador Usuario Registrar

Namespace: Controlador
Assembly: Polideportivo.dll

Syntax

public class controladorUsuarioRegistrar

#### Constructors

## control ador Usuario Registrar (form Usuario Registrar)

Declaration

public controladorUsuarioRegistrar(formUsuarioRegistrar Vista)

#### Parameters

| ТҮРЕ                 | NAME  | DESCRIPTION |
|----------------------|-------|-------------|
| formUsuarioRegistrar | Vista |             |

#### Methods

## cargarForm(Object, EventArgs)

Declaration

public void cargarForm(object sender, EventArgs e)

#### Parameters

| ТҮРЕ             | NAME   | DESCRIPTION |
|------------------|--------|-------------|
| System.Object    | sender |             |
| System.EventArgs | е      |             |

## clickUsuarioRegistrar(Object, EventArgs)

Declaration

public void clickUsuarioRegistrar(object sender, EventArgs e)

#### Parameters

| ТУРЕ             | NAME   | DESCRIPTION |
|------------------|--------|-------------|
| System.Object    | sender |             |
| System.EventArgs | е      |             |

## Class daoPuesto

Inheritance

System.Object

daoPuesto

Namespace: Controlador
Assembly: Polideportivo.dll

Syntax

public class daoPuesto

## Methods

#### mostrarPuesto()

Metodo que sirve para mostrar el puesto que tiene cada uno de los empleados

Declaration

public List<dtoPuesto> mostrarPuesto()

| ТҮРЕ  | DESCRIPTION                                      |
|---|--|
| System.Collections.Generic.List < dtoPuesto > | Retorna los puestos existentes en la tablaPuesto |

# Class daoTipoUsuario

Inheritance

System.Object daoTipoUsuario

Namespace: Controlador
Assembly: Polideportivo.dll

Syntax

public class daoTipoUsuario

#### Methods

## mostrarTipoUsuario()

Método que sirve para mostrar los tipos de usuario

Declaration

public List<dtoTipoUsuario> mostrarTipoUsuario()

| ТҮРІ  | E   | DESCRIPTION  |
|-------|---|--|
| Syste | em. Collections. Generic. List < dto Tipo Usuario > | Retorna la consulta a la base de datos que son los tipos de usuario de la tablaTipoUsuario |

# Namespace Modelo.DAO

## Classes

## daoAnotacion

Clase utilizada para agregar, modificar, eliminar o mostrar los campos de anotaciones en la base de datos.

## dao Campeonato

Clase utilizada para agregar, modificar, eliminar o mostrar los campos de campeonatos en la base de datos.

daoEmpleado

daoEntrenador

dao Equipo

daoEstadoPartido

daoRol

dao Tipo Campeonato

daoTipoFalta

## Class daoAnotacion

Clase utilizada para agregar, modificar, eliminar o mostrar los campos de anotaciones en la base de datos.

Inheritance

System.Object

daoAnotacion

Namespace: Modelo.DAO Assembly: Polideportivo.dll

Syntax

public class daoAnotacion

#### Methods

## agregarAnotacion(dtoAnotacion)

Método que sirve para agregar nuevas anotaciones según el jugador

Declaration

public dtoAnotacion agregarAnotacion(dtoAnotacion modelo)

#### Parameters

| ТҮРЕ         | NAME   | DESCRIPTION   |
|--------------|--------|---|
| dtoAnotacion | modelo | Se ingresa el modelo de anotaciones que se va a agregar |

#### Returns

| ТҮРЕ         | DESCRIPTION  |  |
|--------------|--|--|
| dtoAnotacion | Devuelve el modelo agregado si tuvo éxito para añadirlo a la tabla |  |

## eliminarAnotacion(dtoAnotacion)

Método que sirve para eliminar anotaciones

Declaration

public dtoAnotacion eliminarAnotacion(dtoAnotacion modelo)

## Parameters

| ТУРЕ         | NAME   | DESCRIPTION                                 |
|--------------|--------|---|
| dtoAnotacion | modelo | Se ingresa el modelo que se quiere eliminar |

| ТҮРЕ         | DESCRIPTION                    |  |
|--------------|--------------------------------|--|
| dtoAnotacion | Devuelve el modelo que eliminó |  |

## modificarAnotacion(dtoAnotacion)

Método que sirve para modificar las anotaciones de algún jugador

## Declaration

public dtoAnotacion modificarAnotacion(dtoAnotacion modelo)

#### Parameters

| ТҮРЕ         | NAME   | DESCRIPTION  |
|--------------|--------|--|
| dtoAnotacion | modelo | Se ingresa el modelo del jugador que se quiere modificar |

#### Returns

| ТҮРЕ         | DESCRIPTION   |  |
|--------------|---|--|
| dtoAnotacion | Retorna el modelo modificado para actualizar la tabla |  |

## mostrarAnotacion()

Método que sirve para ver las anotaciones de cada jugador

#### Declaration

public List<dtoAnotacion> mostrarAnotacion()

| ТҮРЕ  | DESCRIPTION   |
|---|---|
| System.Collections.Generic.List <dtoanotacion></dtoanotacion> | Devuelve una lista ordenada según las anotaciones de cada jugador |

## Class daoCampeonato

Clase utilizada para agregar, modificar, eliminar o mostrar los campos de campeonatos en la base de datos.

Inheritance

System.Object

daoCampeonato

Namespace: Modelo.DAO

Assembly: Polideportivo.dll

Syntax

public class daoCampeonato

#### Methods

## AgregarCampeonato(dtoCampeonato)

Método que sirve para agregar nuevos campeonatos a la base de datos

Declaration

public dtoCampeonato AgregarCampeonato(dtoCampeonato modelo)

#### Parameters

| ТҮРЕ          | NAME   | DESCRIPTION  |
|---------------|--------|--|
| dtoCampeonato | modelo | Recibe el modelo de Campeonato que se desea ingresar |

#### Returns

| ТҮРЕ          | DESCRIPTION  |  |
|---------------|--|--|
| dtoCampeonato | Retorna el campeonato ingresado para ser agregado a la tabla |  |

## eliminar Campeonato (dto Campeonato)

Método que sirve para eliminar campeonatos

Declaration

public dtoCampeonato eliminarCampeonato(dtoCampeonato modelo)

## Parameters

| ТУРЕ          | NAME   | DESCRIPTION                                 |
|---------------|--------|---|
| dtoCampeonato | modelo | Reibe el modelo del campeonato seleccionado |

| ТҮРЕ          | DESCRIPTION   |
|---------------|---|
| dtoCampeonato | Retorna el modelo del jugador seleccionado para ser eliminado |

## Modificar Campeonato (dto Campeonato)

Método que sirve para modificar campeonatos

## Declaration

public dtoCampeonato ModificarCampeonato(dtoCampeonato modelo)

#### Parameters

| ТҮРЕ          | NAME   | DESCRIPTION   |
|---------------|--------|---|
| dtoCampeonato | modelo | Recibe el modelo de campeonato que se desea modificar |

#### Returns

| ТУРЕ          | DESCRIPTION   |
|---------------|---|
| dtoCampeonato | Retorna el jugador seleccionado para ser modificado en la tabla |

## mostrarCampeonato()

Método que sirve para mostrar los campeonatos

#### Declaration

public List<dtoCampeonato> mostrarCampeonato()

| ТҮРЕ  | DESCRIPTION  |
|---|--|
| System.Collections.Generic.List <dtocampeonato></dtocampeonato> | Retorna los campeonatos para ser mostrados en la tabla |

## Class daoEmpleado

Inheritance

System.Object daoEmpleado

Namespace: Modelo.DAO

Assembly: Polideportivo.dll

Syntax

public class daoEmpleado

#### Methods

## agregarEmpleado(dtoEmpleado)

Método que sirve para agregar nuevos empleados a la base de datos

Declaration

public dtoEmpleado agregarEmpleado(dtoEmpleado modelo)

#### Parameters

| ТҮРЕ        | NAME   | DESCRIPTION  |
|-------------|--------|--|
| dtoEmpleado | modelo | Recibe el modelo de empleado que se desea ingresar |

#### Returns

| ТҮРЕ        | DESCRIPTION  |  |
|-------------|--|--|
| dtoEmpleado | Retorna el empleado ingresado para ser agregado a la tabla |  |

## eliminarEmpleado(dtoEmpleado)

Metodo que sirve para eliminar el empleado seleccionado de la base de datos

Declaration

public dtoEmpleado eliminarEmpleado(dtoEmpleado modelo)

#### Parameters

| ТУРЕ        | NAME   | DESCRIPTION                               |
|-------------|--------|---|
| dtoEmpleado | modelo | Recibe el modelo del empleado seleccioado |

#### Returns

| ТҮРЕ        | DESCRIPTION   |
|-------------|---|
| dtoEmpleado | Retorna el modelo del empleado seleccionado para eliminarlo |

modificarEmpleado(dtoEmpleado)

## Método que sirve para modificar empleados

#### Declaration

public dtoEmpleado modificarEmpleado(dtoEmpleado modelo)

#### Parameters

| TYPE        | NAME   | DESCRIPTION  |
|-------------|--------|--|
| dtoEmpleado | modelo | Recibe el modelo del empleado para poder modificarlo |

#### Returns

| ТҮРЕ        | DESCRIPTION  |  |
|-------------|--|--|
| dtoEmpleado | Retorna el empleado modificado para ser modificado en la tabla |  |

## mostrarEmpleado()

Metodo que sirve para mostrar los empleados

#### Declaration

public List<dtoEmpleado> mostrarEmpleado()

| ТҮРЕ  | DESCRIPTION  |
|---|--|
| System.Collections.Generic.List < dtoEmpleado > | Retorna la consulta de la base de datos que son los empleados de la tablaEmpleados |

## Class daoEntrenador

Inheritance

System.Object daoEntrenador

Namespace: Modelo.DAO

Assembly: Polideportivo.dll

Syntax

public class daoEntrenador

#### Methods

## agregarEntrenador(dtoEntrenador)

Método que sirve para agregar nuevos entrenadores a la base de datos

Declaration

public dtoEntrenador agregarEntrenador(dtoEntrenador modelo)

#### Parameters

| ТҮРЕ          | NAME   | DESCRIPTION   |
|---------------|--------|---|
| dtoEntrenador | modelo | Recibe el modelo del entrenador que se desea ingresar |

#### Returns

| ТҮРЕ          | DESCRIPTION  |
|---------------|--|
| dtoEntrenador | Retorna el entrenador ingresado para ser agregado a la tabla |

## eliminarEntrenador(dtoEntrenador)

Método que sirve para eliminar el entrenador seleccionado de la base de datos

Declaration

public dtoEntrenador eliminarEntrenador(dtoEntrenador modelo)

#### Parameters

| ТУРЕ          | NAME   | DESCRIPTION                                  |
|---------------|--------|--|
| dtoEntrenador | modelo | Recibe el modelo del entrenador seleccionado |

#### Returns

| ТҮРЕ          | DESCRIPTION   |
|---------------|---|
| dtoEntrenador | Retorna el modelo del entrenador seleccionado para eliminarlo |

modificarEntrenador(dtoEntrenador)

Método que sirve para modificar a los entrenadores

#### Declaration

public dtoEntrenador modificarEntrenador(dtoEntrenador modelo)

#### Parameters

| ТҮРЕ          | NAME   | DESCRIPTION                                     |
|---------------|--------|---|
| dtoEntrenador | modelo | Recibe el modelo de entrenador para modificarlo |

#### Returns

| ТҮРЕ          | DESCRIPTION  |
|---------------|--|
| dtoEntrenador | Retorna el entrenador modificado para ser modificado en la tabla |

## mostrarEntrenador()

Método que sirve para mostrar los jugadores

## Declaration

public List<dtoEntrenador> mostrarEntrenador()

| ТҮРЕ  | DESCRIPTION  |
|---|--|
| System.Collections.Generic.List <dtoentrenador></dtoentrenador> | Retorna la consulta a la base de datos que son los jugadores de la tablaEntrenador |

# Class daoEquipo

Inheritance

System.Object daoEquipo

Namespace: Modelo.DAO

Assembly: Polideportivo.dll

Syntax

public class daoEquipo

#### Methods

## agregarEquipo(dtoEquipo)

Método que sirve para agregar nuevos equipos a la base de datos

Declaration

public dtoEquipo agregarEquipo(dtoEquipo modelo)

#### Parameters

| ТҮРЕ      | NAME   | DESCRIPTION                                      |
|-----------|--------|--|
| dtoEquipo | modelo | Recibe el modelo de equipo que se desea ingresar |

#### Returns

| ТҮРЕ      | DESCRIPTION                                      |  |
|-----------|--|--|
| dtoEquipo | Recibe el modelo de equipo que se desea ingresar |  |

## eliminarEquipo(dtoEquipo)

Metodo que sirve para eliminar el equipo seleccionado de la base de datos

Declaration

public dtoEquipo eliminarEquipo(dtoEquipo modelo)

#### Parameters

| ТҮРЕ      | NAME   | DESCRIPTION                              |
|-----------|--------|--|
| dtoEquipo | modelo | Recibe el modelo del equipo seleccionado |

#### Returns

| ТҮРЕ      | DESCRIPTION   |
|-----------|---|
| dtoEquipo | Retorna el modelo del equipo seleccionado para eliminarlo |

## modificarEquipo(dtoEquipo)

## Método que sirve para modificar equipos

#### Declaration

public dtoEquipo modificarEquipo(dtoEquipo modelo)

#### Parameters

| ТҮРЕ      | NAME   | DESCRIPTION                                       |
|-----------|--------|---|
| dtoEquipo | modelo | Recibe el modelo de equipo para poder modificarlo |

#### Returns

| ТҮРЕ      | DESCRIPTION  |  |
|-----------|--|--|
| dtoEquipo | Retorna el equipo modificado para ser modificado en la tabla |  |

## mostrarEquipo()

Metodo que sirve para mostrar los equipos

#### Declaration

public List<dtoEquipo> mostrarEquipo()

#### Returns

| TYPE                |                                      | DESCRIPTION   |
|---------------------|--------------------------------------|---|
| System.Collections. | Generic.List <dtoequipo></dtoequipo> | Retorna la consulta a la base de datos que son los jugadores de la tablaEquipos |

## mostrarEquipoPorDeporte(dtoEquipo)

Metodo que sirve para mostrar los jugadores por el deporte que se seleccionó

## Declaration

public List<dtoEquipo> mostrarEquipoPorDeporte(dtoEquipo modelo)

#### Parameters

| ТҮРЕ      | NAME   | DESCRIPTION |
|-----------|--------|-------------|
| dtoEquipo | modelo |             |

#### Returns

| ТҮРЕ  | DESCRIPTION  |
|---|--|
| System.Collections.Generic.List <dtoequipo></dtoequipo> | Retorna el equipo ingresado para ser agregado a la tabla |

## mostrarEquipos()

Metodo que sirve para mostrar los equipos

#### Declaration

public List<dtoEquipo> mostrarEquipos()

| ТҮРЕ  | DESCRIPTION   |
|---|---|
| System.Collections.Generic.List <dtoequipo></dtoequipo> | Retorna la consulta a la base de datos que son los jugadores de la tablaEquipos |

## Class daoEstadoPartido

Inheritance

System.Object daoEstadoPartido

Namespace: Modelo.DAO

Assembly: Polideportivo.dll

Syntax

public class daoEstadoPartido

#### Methods

## agregarEstado(dtoEstadoPartido)

Método que sirve para agregar nuevos estados de partido a la base de datos

Declaration

public dtoEstadoPartido agregarEstado(dtoEstadoPartido modelo)

#### Parameters

| ТҮРЕ             | NAME   | DESCRIPTION  |
|------------------|--------|--|
| dtoEstadoPartido | modelo | Recibe el modelo de estado partido que se desea ingresar |

#### Returns

| ТУРЕ             | DESCRIPTION |
|------------------|-------------|
| dtoEstadoPartido |             |

## eliminarEstado(dtoEstadoPartido)

Metodo que sirve para eliminar el estado partido seleccionado de la base de datos

Declaration

public dtoEstadoPartido eliminarEstado(dtoEstadoPartido modelo)

#### Parameters

| ТУРЕ             | NAME   | DESCRIPTION                                      |
|------------------|--------|--|
| dtoEstadoPartido | modelo | Recibe el modelo del estado partido seleccionado |

#### Returns

| ТҮРЕ             | DESCRIPTION   |
|------------------|---|
| dtoEstadoPartido | Retorna el modelo del estado partido seleccionado para eliminarlo |

## modificarEstado(dtoEstadoPartido)

Método que sirve para modificar los estados de partido

Declaration

public dtoEstadoPartido modificarEstado(dtoEstadoPartido modelo)

#### Parameters

| ТҮРЕ             | NAME   | DESCRIPTION   |
|------------------|--------|---|
| dtoEstadoPartido | modelo | Recibe el modelo de estado partido para poder modificarlo |

#### Returns

| ТУРЕ             | DESCRIPTION   |
|------------------|---|
| dtoEstadoPartido | Retorna el estado partido para ser modificado en la tabla |

## mostrarEstado()

Metodo que sirve para mostrar los estado partido

## Declaration

public List<dtoEstadoPartido> mostrarEstado()

| ТҮРЕ  | DESCRIPTION   |
|---|---|
| System.Collections.Generic.List <dtoestadopartido></dtoestadopartido> | Retorna la consulta a la base de datos que son los estados partido de la tablaEstadoPartido |

## Class daoRol

Inheritance

System.Object

daoRol

Namespace: Modelo.DAO

Assembly: Polideportivo.dll

Syntax

public class daoRol

#### Constructors

#### daoRol()

Declaration

public daoRol()

#### Methods

## agregarRol(dtoRol)

Método que sirve para agregar nuevos roles a la base de datos

Declaration

public dtoRol agregarRol(dtoRol modelo)

#### Parameters

| ТҮРЕ   | NAME   | DESCRIPTION                                   |
|--------|--------|---|
| dtoRol | modelo | Recibe el modelo de rol que se desea ingresar |

### Returns

| ТҮРЕ   | DESCRIPTION   |
|--------|---|
| dtoRol | Retorna el rol ingresado para ser agregado a la tabla |

## eliminarRol(dtoRol)

Metodo que sirve para eliminar el rol seleccionado de la base de datos

Declaration

public dtoRol eliminarRol(dtoRol modelo)

## Parameters

| ТҮРЕ   | NAME   | DESCRIPTION                           |
|--------|--------|---------------------------------------|
| dtoRol | modelo | Recibe el modelo del rol seleccionado |

| ТҮРЕ   | DESCRIPTION  |
|--------|--|
| dtoRol | Retorna el modelo del rol seleccionado para eliminarlo |

## modificarRol(dtoRol)

Método que sirve para modificar roles

Declaration

public dtoRol modificarRol(dtoRol modelo)

#### Parameters

| ТҮРЕ   | NAME   | DESCRIPTION                                    |
|--------|--------|--|
| dtoRol | modelo | Recibe el modelo de rol para poder modificarlo |

#### Returns

| ТҮРЕ   | DESCRIPTION   |
|--------|---|
| dtoRol | Retorna el rol modificado para ser modificado en la tabla |

## mostrarRoles()

Metodo que sirve para mostrar los roles

Declaration

public List<dtoRol> mostrarRoles()

## Returns

| ТҮРЕ                                       | DESCRIPTION   |
|--|---|
| System.Collections.Generic.List < dtoRol > | Retorna la consulta a la base de datos que son los roles de la tablaRoles |

## mostrar Roles Por Deporte (dto Rol)

Metodo que sirve para mostrar los roles por el deporte que se seleccionó

Declaration

public List<dtoRol> mostrarRolesPorDeporte(dtoRol modelo)

#### Parameters

| ТУРЕ   | NAME   | DESCRIPTION |
|--------|--------|-------------|
| dtoRol | modelo |             |

| ТУРЕ  | DESCRIPTION                            |
|---|--|
| System.Collections.Generic.List <dtorol></dtorol> | Retorna la consulta a la base de datos |

# Class daoTipoCampeonato

Inheritance

System.Object

dao Tipo Campeonato

Namespace: Modelo.DAO

Assembly: Polideportivo.dll

Syntax

public class daoTipoCampeonato

#### Methods

mostrar Tipo De Campeonatos ()

Metodo que sirve para mostrar los tipos de campeonatos

Declaration

public List<dtoTipoCampeonato> mostrarTipoDeCampeonatos()

| ТҮРЕ  | DESCRIPTION   |
|---|---|
| System.Collections.Generic.List < dtoTipoCampeonato > | Retorna la consulta a la base de datos que son los tipos de campeonato de la tablaTiposDeCampeonato |

## Class daoTipoFalta

Inheritance

System.Object daoTipoFalta

Namespace: Modelo.DAO

Assembly: Polideportivo.dll

Syntax

public class daoTipoFalta

#### Methods

## agregarTipoFalta(dtoTipoFalta)

Método que sirve para agregar nuevos tipos falta a la base de datos

Declaration

public dtoTipoFalta agregarTipoFalta(dtoTipoFalta modelo)

#### Parameters

| ТҮРЕ         | NAME   | DESCRIPTION  |
|--------------|--------|--|
| dtoTipoFalta | modelo | Recibe el modelo de tipo falta que se desea ingresar |

#### Returns

| ТҮРЕ         | DESCRIPTION  |
|--------------|--|
| dtoTipoFalta | Retorna la tipo falta ingresado para ser agregado a la tabla |

## eliminarTipoFalta(dtoTipoFalta)

Metodo que sirve para eliminar la tipo falta seleccionada de la base de datos

Declaration

public dtoTipoFalta eliminarTipoFalta(dtoTipoFalta modelo)

#### Parameters

| ТҮРЕ         | NAME   | DESCRIPTION                                 |
|--------------|--------|---|
| dtoTipoFalta | modelo | Recibe el modelo de tipo falta seleccionada |

| ТҮРЕ         | DESCRIPTION   |
|--------------|---|
| dtoTipoFalta | Retorna el modelo de tipo falta seleccionada para eliminarl |

## Método que sirve para modificar el tipo falta

#### Declaration

public dtoTipoFalta modificarTipoFalta(dtoTipoFalta modelo)

#### Parameters

| ТҮРЕ         | NAME   | DESCRIPTION   |
|--------------|--------|---|
| dtoTipoFalta | modelo | Recibe el modelo de tipo falta para poder modificarlo |

#### Returns

| ТҮРЕ         | DESCRIPTION  |
|--------------|--|
| dtoTipoFalta | Retorna la tipo falta modificada para ser modificada en la tabla |

## mostrarTipoFalta()

Metodo que sirve para mostrar tipo falta

## Declaration

public List<dtoTipoFalta> mostrarTipoFalta()

| ТУРЕ  | DESCRIPTION  |
|---|--|
| System.Collections.Generic.List <dtotipofalta></dtotipofalta> | Retorna la consulta a la base de datos que son las tipo falta de la tablaTipoFalta |

# Namespace Modelo.DTO

## Class dtoAnotacion

Inheritance

System.Object

dtoAnotacion

Namespace: Modelo.DTO

Assembly: Polideportivo.dll

Syntax

public class dtoAnotacion

#### Constructors

#### dtoAnotacion()

Declaration

public dtoAnotacion()

## dtoAnotacion(Int32, Int32, Int32, Int32)

Declaration

public dtoAnotacion(int Id, int Cantidad, int IdJugador, int IdPartido)

#### Parameters

| ТҮРЕ         | NAME      | DESCRIPTION |
|--------------|-----------|-------------|
| System.Int32 | Id        |             |
| System.Int32 | Cantidad  |             |
| System.Int32 | ldJugador |             |
| System.Int32 | IdPartido |             |

## **Properties**

#### cantidad

Declaration

public int cantidad { get; set; }

## Property Value

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## fkIdJugador

Declaration

```
public int fkIdJugador { get; set; }
```

| ТУРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## fkld Partido

Declaration

```
public int fkIdPartido { get; set; }
```

Property Value

| ТУРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## pkId

 ${\tt Declaration}$ 

```
public int pkId { get; set; }
```

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

# Class dtoCampeonato

Inheritance

System.Object dtoCampeonato

Namespace: Modelo.DTO

Assembly: Polideportivo.dll

Syntax

public class dtoCampeonato

#### Constructors

#### dtoCampeonato()

Declaration

public dtoCampeonato()

## dtoCampeonato(Int32, String, String, String, Int32, Int32)

Declaration

public dtoCampeonato(int Id, string Nombre, string FechaInicio, string FechaFinal, int FkIdDeporte, int FkIdTipoCampeonato)

#### Parameters

| ТУРЕ          | NAME               | DESCRIPTION |
|---------------|--------------------|-------------|
| System.Int32  | Id                 |             |
| System.String | Nombre             |             |
| System.String | Fechalnicio        |             |
| System.String | FechaFinal         |             |
| System.Int32  | FkIdDeporte        |             |
| System.Int32  | FkIdTipoCampeonato |             |

## **Properties**

## fechaFinal

Declaration

public string fechaFinal { get; set; }

## Property Value

| ТҮРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

#### fechalnicio

Declaration

| <pre>public string fechaInicio { get; set; }</pre> |  |
|--|--|
|--|--|

## Property Value

| ТҮРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

## fkld Deporte

Declaration

```
public int fkIdDeporte { get; set; }
```

## Property Value

| ТУРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## fkIdTipo Campeonato

Declaration

```
public int fkIdTipoCampeonato { get; set; }
```

## Property Value

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

#### nombre

Declaration

```
public string nombre { get; set; }
```

## Property Value

| ТҮРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

## pkId

Declaration

```
public int pkId { get; set; }
```

| ТУРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

# Class dtoDeporte

Inheritance

System.Object dtoDeporte

Namespace: Modelo.DTO

Assembly: Polideportivo.dll

Syntax

public class dtoDeporte

#### Constructors

## dtoDeporte()

Declaration

public dtoDeporte()

## dtoDeporte(Int32, String)

Declaration

public dtoDeporte(int Id, string Nombre)

#### Parameters

| ТҮРЕ          | NAME   | DESCRIPTION |
|---------------|--------|-------------|
| System.Int32  | Id     |             |
| System.String | Nombre |             |

## **Properties**

## nombre

Declaration

public string nombre { get; set; }

## Property Value

| ТУРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

## pkld

Declaration

```
public int pkId { get; set; }
```

| ТУРЕ         | DESCRIPTION |  |
|--------------|-------------|--|
| System.Int32 |             |  |

# Class dtoEmpleado

Inheritance

System.Object dtoEmpleado

Namespace: Modelo.DTO

Assembly: Polideportivo.dll

Syntax

public class dtoEmpleado

#### Constructors

#### dtoEmpleado()

Declaration

public dtoEmpleado()

dtoEmpleado(Int32, String, Int32, Int32)

Declaration

public dtoEmpleado(int Id, string Nombre, int IdEquipo, int IdPuestoEmpleado)

#### Parameters

| ТҮРЕ          | NAME             | DESCRIPTION |
|---------------|------------------|-------------|
| System.Int32  | Id               |             |
| System.String | Nombre           |             |
| System.Int32  | IdEquipo         |             |
| System.Int32  | IdPuestoEmpleado |             |

## **Properties**

## fkIdPuestoEmpleado

Declaration

public int fkIdPuestoEmpleado { get; set; }

## Property Value

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

#### nombre

Declaration

public string nombre { get; set; }

| ТҮРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

## pkId

Declaration

```
public int pkId { get; set; }
```

| ТУРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## Class dtoEntrenador

Inheritance

System.Object

dtoEntrenador

Namespace: Modelo.DTO

Assembly: Polideportivo.dll

Syntax

public class dtoEntrenador

#### Constructors

#### dtoEntrenador()

Declaration

public dtoEntrenador()

## dtoEntrenador(Int32, String, Int32, Int32)

Declaration

public dtoEntrenador(int Id, string Nombre, int IdEquipo, int IdDeporte)

#### Parameters

| ТҮРЕ          | NAME      | DESCRIPTION |
|---------------|-----------|-------------|
| System.Int32  | Id        |             |
| System.String | Nombre    |             |
| System.Int32  | IdEquipo  |             |
| System.Int32  | IdDeporte |             |

## **Properties**

## fkIdDeporte

Declaration

```
public int fkIdDeporte { get; set; }
```

## Property Value

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## fkIdEquipo

Declaration

```
public int fkIdEquipo { get; set; }
```

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## nombre

Declaration

```
public string nombre { get; set; }
```

Property Value

| ТУРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

## pkId

Declaration

```
public int pkId { get; set; }
```

| ТҮРЕ         | DESCRIPTION |

| System.Int32  | anotacion1   |             |
| System.Int32  | anotacion2   |             |
| System.Int32  | fase         |             |

## **Properties**

## anotaciones Equipo 1

Declaration

```
public int anotacionesEquipo1 { get; set; }
```

Property Value

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## anotaciones Equipo 2

Declaration

```
public int anotacionesEquipo2 { get; set; }
```

Property Value

| ТУРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

#### campo

Declaration

```
public string campo { get; set; }
```

Property Value

| ТУРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

## equipo1

Declaration

```
public string equipo1 { get; set; }
```

Property Value

| ТУРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

#### equipo2

Declaration

```
public string equipo2 { get; set; }
```

| ТҮРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

## fecha

Declaration

|--|--|

Property Value

| ТҮРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

## fkldCampeonato

Declaration

```
public int fkIdCampeonato { get; set; }
```

Property Value

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## fkld Empleado

Declaration

```
public int fkIdEmpleado { get; set; }
```

Property Value

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

#### fkIdEstadoPartido

Declaration

```
public int fkIdEstadoPartido { get; set; }
```

Property Value

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

#### fkIdFase

Declaration

```
public int fkIdFase { get; set; }
```

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

#### Declaration

| } |  |  |
|---|--|--|
|---|--|--|

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## Class dtoPuesto

Inheritance

System.Object

dtoPuesto

Namespace: Modelo.DTO

Assembly: Polideportivo.dll

Syntax

public class dtoPuesto

#### Constructors

#### dtoPuesto()

Declaration

public dtoPuesto()

## dtoPuesto(Int32, String)

Declaration

public dtoPuesto(int Id, string Nombre)

#### Parameters

| ТҮРЕ          | NAME   | DESCRIPTION |
|---------------|--------|-------------|
| System.Int32  | Id     |             |
| System.String | Nombre |             |

#### **Properties**

## nombre

Declaration

public string nombre { get; set; }

## Property Value

| ТУРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

## pkld

Declaration

```
public int pkId { get; set; }
```

| ТҮРЕ         | DESCRIPTION |
|--------------|-------------|
| System.Int32 |             |

## Class dtoRol

Inheritance

System.Object

dtoRol

Namespace: Modelo.DTO

Assembly: Polideportivo.dll

Syntax

public class dtoRol

#### Constructors

#### dtoRol()

Declaration

public dtoRol()

## dtoRol(Int32, String, Int32)

Declaration

public dtoRol(int Id, string Nombre, int FkIdDeporte)

#### Parameters

| ТҮРЕ          | NAME        | DESCRIPTION |
|---------------|-------------|-------------|
| System.Int32  | Id          |             |
| System.String | Nombre      |             |
| System.Int32  | FkIdDeporte |             |

## **Properties**

### fkIdDeporte

Declaration

public int fkIdDeporte { get; set; }

#### Property Value

| ТҮРЕ         | DESCRIPTION |  |
|--------------|-------------|--|
| System.Int32 |             |  |

### nombre

Declaration

public string nombre { get; set; }

| ТҮРЕ          | DESCRIPTION |
|---------------|-------------|
| System.String |             |

Syntax

public class formPartido : Form, IDropTarget, ISynchronizeInvoke, IWin32Window, IBindableComponent,
IArrangedElement, IComponent, IDisposable, IContainerControl

### Constructors

#### formPartido()

Declaration

public formPartido()

#### Fields

#### btnActualizar

Declaration

public Button btnActualizar

Field Value

| ТУРЕ                        | DESCRIPTION |
|-----------------------------|-------------|
| System.Windows.Forms.Button |             |

# btn Agregar Partido

Declaration

public Button btnAgregarPartido

Field Value

| ТҮРЕ                        | DESCRIPTION |  |
|-----------------------------|-------------|--|
| System.Windows.Forms.Button |             |  |

#### btnEliminar

Declaration

public Button btnEliminar

| ТҮРЕ                        | DESCRIPTION |
|-----------------------------|-------------|
| System.Windows.Forms.Button |             |

# btnModificar

Declaration

public Button btnModificar

Field Value

| ТУРЕ                        | DESCRIPTION |
|-----------------------------|-------------|
| System.Windows.Forms.Button |             |

### cboBuscar

Declaration

public ComboBox cboBuscar

# Field Value

| ТУРЕ                          | DESCRIPTION |
|-------------------------------|-------------|
| System.Windows.Forms.ComboBox |             |

### tablaPartidos

Declaration

public AdvancedDataGridView tablaPartidos

Field Value

| ТҮРЕ                           | DESCRIPTION |
|--------------------------------|-------------|
| Zuby.ADGV.AdvancedDataGridView |             |

## txtFiltrar

Declaration

public TextBox txtFiltrar

Field Value

| ТҮРЕ                         | DESCRIPTION |
|------------------------------|-------------|
| System.Windows.Forms.TextBox |             |

# vwPartido

Declaration

public vwPartido vwPartido

| ТУРЕ            | DESCRIPTION |
|-----------------|-------------|
| Datos.vwPartido |             |

# vwpartidoBindingSource

Declaration

public BindingSource vwpartidoBindingSource

#### Field Value

| ТҮРЕ                               | DESCRIPTION |
|------------------------------------|-------------|
| System.Windows.Forms.BindingSource |             |

# vwpartido Table Adapter

Declaration

public vwpartidoTableAdapter vwpartidoTableAdapter

### Field Value

| ТҮРЕ   | DESCRIPTION |
|--|-------------|
| Datos.vwPartidoTableAdapters.vwpartidoTableAdapter |             |

# Methods

Dispose(Boolean)

Clean up any resources being used.

Declaration

protected override void Dispose(bool disposing)

### Parameters

| ТҮРЕ           | NAME      | DESCRIPTION   |
|----------------|-----------|---|
| System.Boolean | disposing | true if managed resources should be disposed; otherwise, false. |

#### Overrides

System. Windows. Forms. Form. Dispose (System. Boolean)

# Class formPartidoEventos

Inheritance

formPartidoEventos

Namespace: Vista

Assembly: Polideportivo.dll

Syntax

public class formPartidoEventos : Form, IDropTarget, ISynchronizeInvoke, IWin32Window, IBindableComponent,
IArrangedElement, IComponent, IDisposable, IContainerControl

### Constructors

### formPartidoEventos()

Declaration

public formPartidoEventos()

### formPartidoEventos(controladorPartido)

Declaration

public formPartidoEventos(controladorPartido form)

#### Parameters

| ТҮРЕ               | NAME | DESCRIPTION |
|--------------------|------|-------------|
| controladorPartido | form |             |

# formPartidoEventos(dtoPartido, controladorPartido)

Declaration

public formPartidoEventos(dtoPartido modelo, controladorPartido form)

#### Parameters

| ТУРЕ               | NAME   | DESCRIPTION |
|--------------------|--------|-------------|
| dtoPartido         | modelo |             |
| controladorPartido | form   |             |

#### Methods

# Dispose(Boolean)

Clean up any resources being used.

Declaration

# protected override void Dispose(bool disposing)

# Parameters

| ТҮРЕ           | NAME      | DESCRIPTION   |
|----------------|-----------|---|
| System.Boolean | disposing | true if managed resources should be disposed; otherwise, false. |

Syntax

public class formPolideportivo : Form, IDropTarget, ISynchronizeInvoke, IWin32Window, IBindableComponent,
IArrangedElement, IComponent, IDisposable, IContainerControl

### Constructors

# formPolideportivo()

Declaration

public formPolideportivo()

### Methods

### Dispose(Boolean)

Limpiar los recursos que se estén usando.

Declaration

protected override void Dispose(bool disposing)

#### Parameters

| TYPE           | NAME      | DESCRIPTION  |
|----------------|-----------|--|
| System.Boolean | disposing | true si los recursos administrados se deben desechar; false en caso contrario. |

Overrides

System. Windows. Forms. Form. Dispose (System. Boolean)

# OnResizeBegin(EventArgs)

Declaration

protected override void OnResizeBegin(EventArgs e)

### Parameters

| ТУРЕ             | NAME | DESCRIPTION |
|------------------|------|-------------|
| System.EventArgs | е    |             |

Overrides

System. Windows. Forms. Form. On Resize Begin (System. Event Args)

# OnResizeEnd(EventArgs)

Declaration

protected override void OnResizeEnd(EventArgs e)

#### Parameters

| ТҮРЕ             | NAME | DESCRIPTION |
|------------------|------|-------------|
| System.EventArgs | е    |             |

Overrides

System. Windows. Forms. Form. On Resize End (System. Event Args)
